Eligibility Requirements for Health Services

In order for Mahidol University students to be eligible for the health services provided by the centers located in their Faculties, the following restrictions apply:

1. Students must pay the annual health fees and obtain student cards.

2. Students enrolled in the health service plan may present themselves at the Health Center of their Faculty for on-site medical or dental care. For any services the Health Center is unable to provide on-site, patients will be referred by a Health Center doctor to other health service centers attached to the hospital.

3. Outside of normal office hours (8:30-16:30), students may use their health cards to obtain urgent medical services at any of the university hospitals; in such cases, a referral form the Health Center must be provided to the hospital within 24 hours.

4. In emergency cases (accident or serious illness), when a student cannot travel to a university hospital for treatment, (s) he may seek treatment at the nearest hospital. In such cases, the parents or legal guardian should notify in writing the Vice-President for Student Affairs within 24 hours.

The university will re-imburse the patient for services at a rate not to exceed the prevailing rate at the university's own hospitals. All such cases must obtain the approval of the University Health Committee. Should the Health Committee recommend that patient be transferred to a university hospital, the patient must accept the recommendation of the Committee or forfeit entitlement to health benefits under this plan.

5. In order to be covered under this health plan, all drug prescription should be filled at university-attached pharmacies. In the event that the prescribed medicine is not available at a university pharmacy, the patient may have the prescription filled at another pharmacy; both the prescription and the receipt must be presented to the office of the Vice-President of Student Affairs for re-imbursement.

6. Students should read carefully all the rules and regulations.

Dental Care

Only care to relieve pain (to relieve toothache, fill cavities, periodontal treatment) is covered under the student health plan. Dentures and cosmetic treatment are not covered under this plan.

In order to obtain dental treatment students should present their health cards to the Health Center which will refer the patients to the appropriate dental clinic (all medical, nursing, medical technician and graduate students attached to Siriraj Hospital will be referred to the clinic at that hospital; all medical, pharmacy and graduate students attached to Ramathibodi Hospital will be referred to the clinic at that hospital; all dental students, students of the Faculty of Science, students of the Faculty of Public Health and students of the School of Graduate Studies will be referred to the clinic at the Faculty of Dentistry.) (Students can obtain further information from the final page of the Advisory Notice for students of dentistry.)

First-year students studying at the Salaya Campus will be referred to the dental clinic at the Faculty they anticipate joining during their second or third year. In case of emergency, the Salaya Health Center attending physician will refer patients to the Siriraj Hospital dental clinic.

Limits of Coverage under this plan

The university will be responsible for medical fees at rates prevailing in university hospitals up to a maximum of 140 baht/day for hospitalization and food, not to exceed 30,000 baht/year. Hospitalization is limited to 30 days/year, except on the written recommendation of the Director of Student Health Services and/or the attending university physician and with the written approval of the President of the University or his authorized delegate.

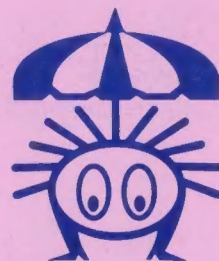

Receiving treatment in hospitals or clinics not attached to the university

Students can receive treatment from hospitals or clinics not attached to the university only in cases of emergency illnesses or accidents. Students must transfer to university-attached hospitals as soon as conditions permit. Re-imbbursement in such cases is limited to rates prevailing at university hospitals. Approval for re-imbbursement in such cases must be obtained from the university health committee.

Medical Care during Field Work

In case of emergency illness or accident during field work, students should seek treatment from a government hospital and obtain a receipt, a diagnostic form and a certificate from the attending physician. Students may be re-imbursed only at rates prevailing at university hospitals and according to the second edition of regulations concerning re-imbbursement for student health issued in the year 2536 of the Buddhist Era.

Non-emergency dental care (fillings, etc.) received while on field work cannot be re-imbursed.

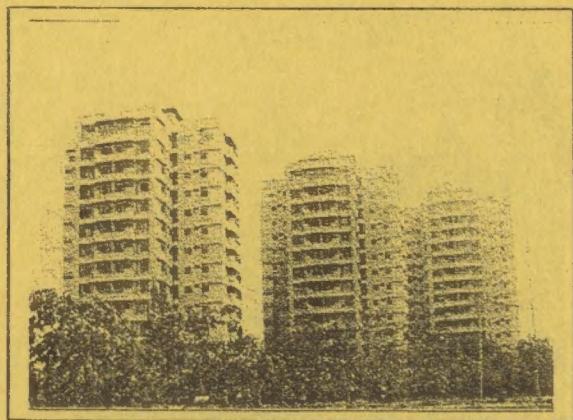

Benefits in the Event of Loss of Life or Limb

In the case of death or injury which prevents the student from continuing of his or her studies, the student or his/her legal heir is entitled to receive 100,000 bath upon submission of all necessary documents to the office of the Division of Student Affairs within one year of the date of eligibility (i.e. one year following the death or accident/illness causing the student to lose the ability to continue his/her studies).
